Award Description*

The PSC will use the grant to support efforts to promote electricity-related initiatives in Alabama and enhance our regulatory capacity to be more proactive and productive. To meet these objectives, we will hire up to five people: four analysts and one administrative support assistant. The analysts will conduct research on new efficiency and demand-response programs, smart grid, carbon capture and renewable energy technologies. They will also research other states' energy efficiency programs and best practices. The PSC plans to open dockets related to energy efficiency, smart grid, renewable fuels, electric vehicles, and regulatory policy review. In addition, the grant will provide training to current staff on regulatory issues related to efficiency efforts, carbon capture and storage technologies and related areas.
